

### **Payphone Surcharge Modification**

The FCC recently released its Fifth Payphone Order on Reconsideration in FCC Docket No. 96-128 (payphone compensation). Pursuant to this Order, the FCC established new amounts of compensation owed to payphone service providers (PSPs) whose payphones are served by switches that do not transmit payphone-specific coding digits.

Therefore, in accordance with the terms of your services agreement with MCI WORLDCOM Network Services, Inc. d/b/a UUNET®, please note that commencing July 1, 2003, your payphone surcharge will be \$.43.

Should you require additional explanation or assistance regarding this issue, please contact your Carrier Account Representative.
